

# falcon 20

The Falcon 20 has a state of the art wing and robust body design that allows it to go places that other jets its size can't. It lands at slower, safer speeds, giving clients access to thousands of smaller rural airports closer to their ultimate destinations. The large and sophisticated stand-up cabin includes a fully stocked refreshment centre with a cappuccino/espresso maker, dual entertainment centers, and a fully enclosed lavatory. Its cabin simply provides world-class comfort and ensures first class productivity.
