NovaJet Awarded Gold Rating by ARGUS International

September 22, 2009 – ARGUS International (ARGUS) is pleased to announce NovaJet has obtained the ARGUS Gold Rating. To achieve an ARGUS Gold Rating an operator must meet the current ARGUS Gold Rating requirements including, but not limited to, maintaining complete, current, and accurate data in the ARGUS CHEQ (Charter Evaluation and Qualification) System suitable for producing an ARGUS TripCHEQ report.

The ARGUS CHEQ System is widely recognized as the most visible and sought after third party due diligence on business aircraft charter operators. Participation in the CHEQ system will now enable charter customers to request the ARGUS TripCHEQ Report containing fully-vetted, real-time information about NovaJet company authorizations, flight crew experience and aircraft accommodations.

TripCHEQ ensures that a NovaJet flight will meet your standards.

TripCHEQ examines:

- Operational Control of the flight. This assures that your flight has not been brokered to another operator without your knowledge.
- The crews' experience in this airplane type.
- The crews' certification and type ratings.

To better serve the buyers and sellers of charter on a real-time basis, ARGUS maintains an exclusive global relationship with Avinode, the world's largest on-line marketplace for charter services on business aircraft. Customers can view ARGUS gold rated operators like NovaJet along with all the aircraft listed on www.avinode.com.

Since 2001, ARGUS has been conducting on-site audits for the business aviation community and has become one of the most respected auditing organizations in the industry. Currently, ARGUS has 71 Platinum rated operators and over 300 Gold Plus and Gold rated operators. ARGUS is uniquely capable of providing audits worldwide for fixed-wing and helicopter operators. Each audit is tailored to reflect the specific needs of a corporate, charter, fractional or airline operation.

ARGUS is the only audit organization that has developed its own industry-leading audit standard for charter operators and also holds authorizations from two world-recognized standards organizations. ARGUS is authorized by both the International Air Transport Association (IATA) and the International Business Aviation Council (IBAC) to perform audits utilizing their respective standards (IATA Operational Safety Audit (IOSA) and the International Standard for Business Aircraft Operations (IS-BAO). Based on auditor and instructor credentials, IATA has named ARGUS one of only three Endorsed Training Organizations accredited to provide IOSA Auditor training.

About ARGUS
